

B1  
end

routing non-idempotent client requests from the another replicated server to the server if the server is still part of the group; and

sending results of processing the non-idempotent client requests to the another replicated server.

---

REMARKS

Claims 1-3 were originally presented in the parent application. Claims 4-30 have hereinabove been added to more particularly point out and distinctly claim the subject invention. Therefore, claims 1-30 remain in this case.

Support for the new claims can be found throughout the specification and, therefore, no new matter has been added. The amendments to the specification merely filled in serial numbers of related applications not available at filing.

Applicants respectfully request substantive examination of claims 1-30.

Attached hereto is a marked up version of the changes made to the specification by the current amendment. The attached pages are captioned "Version with Markings to Show Changes Made."

CONCLUSION

If a telephone conference would be of assistance in advancing prosecution of the subject application, Applicants' undersigned attorney invites the Examiner to telephone him at the number provided.
